

# Shepherd Hall Restaurant and Servery

## St. Thomas' Hospital

Lambeth Palace Road, London SE1

### Project Description

Refurbishment and renovation of Shepherd Hall Restaurant, including the servery area, entrance corridor, back of house areas and services work in the basement – carried out in only 10 weeks, and 12 weeks for the servery area.

#### DINING HALL and CORRIDOR

- Formation of new structural openings.
- Renovation of joinery, timber panelling, wood block flooring and mosaic flooring in the corridor.
- Refurbishment and renovation of windows and feature external doors, the latter removed from site for renovation, for which temporary waterproof screens were erected.
- New floating suspended ceiling panels with special lighting.
- M & E services upgraded and extended.

#### SERVERY

- Complete strip out and replacement of all catering equipment & servery furniture to a re-modelled layout.
- Modified services, new air con & new extract canopy.
- New tiling, suspended ceilings, roller shutters & decorations.

#### BACK OF HOUSE AREAS

- Alterations, upgrading and refurbishment of office and staff changing areas.

#### BASEMENT

- Installation of a replacement air handling unit, extract plant and ductworks in a confined space with awkward access.
