Our IT Security

It is essential that all electronic information is maintained and does not jeopardise business relationships with a failure in technology. Increasingly, business is done via the internet or other forms of electronic communication. It is important that our staff respect the equipment that they are given and ensure that it is kept safe and secure. They should not download any software (from the internet or from emails) or place any hardware into company IT equipment without authorisation from their Line Manager.

When they leave their personal computer (PC) or laptop, they must lock the computer with an effective password. Passwords should not be written down or shared with other employees, unless a Senior Manager requests your password.

At the end of each working day our staff must restart your desktop computer that are connected to our network, but not log in. This is because the account must not be left logged in overnight for security reasons, as maintenance and upgrading will take place overnight.

Laptops should be locked away securely when not in use and kept safe when working from home or out of the office.

How to complain

We hope that we OR our Data Protection Officer can resolve any query or concern you may raise about our use of your information.

The General Data Protection Regulation <https://ico.org.uk/for-organisations/guide-to-the-general-data-protection-regulation-gdpr/individual-rights/> also gives you right to lodge a complaint with a supervisory authority, in particular in the European Union (or European Economic Area) state where you work, normally live or where any alleged infringement of data protection laws occurred. The supervisory authority in the UK is the Information Commissioner who may be contacted at <https://ico.org.uk/make-a-complaint> or telephone: 0303 123 1113.
